[It is obvious that different countries make a different influence on our world. Now I would like to give my thoughts about this important problem.

As you know, in countries exists different types of traditional dishes and food. For example, the most popular dish, that gives association with Russia, is Borscht. Popular Italian food is spaghetti. This traditional food is famous all over the world and it can tell us about country's culture.

Planet Earth is an interesting and huge place with it's differences in geography. There is a different types of natural resources in countries that help our civilization in development.

Cultural activities in countries is important too, because cultural exchange between countries can help citizens to learn more about culture and traditions in other places.

For example, a singer from Russia become popular and giving a concert in other country. It will help people of other country learn more about Russia.

In conclusion, I want to say that different countries gives the world a part of their culture and traditions. I think it helps people from different part of the world ^{to} better know each other and feel like they are all similar in their thoughts.
