It goes without saying that every country is absolutely unique. It has its own location, culture, and language. So, in this essay I want to talk about
35 contribution that different countries give to the world.

First of all, ~~there are~~ ^{they give us} many different peoples with their mentality^{ies} and languages. Dwing to this, every person can talk to someone different, share with them
33 their thoughts, views on the world.

Secondly, every country has their national food. ^{kinds of dishes} Some ~~food~~ we ~~are not able~~ ^{can not} taste in Russia, but we always can travel abroad to the west or east, and eat something special there. And it will not only have different name, but it will taste absolutely differently. For example, it might be more sweet or spicy, than
58 usually.

And the last one are natural resources. Undoubtedly, Definitely without some rare metals, ^{which we are not able} ~~and precious materials~~ ^{to find in our country,} ~~we could not~~ ^{have} make some beautiful
30 jewelry. ~~Also, some country could not~~

It is clear from everything above that countries give a lot of different things to each other. ~~and also have a big influence on people in So we should appreciate that we are~~ And in my honest opinion ^{is} that is really good.
